

SmartStockAI: Predictive Inventory & Deadstock Management

How We Are Leveraging LLM to Enhance Functionality and Efficiency

- Simplified Data Interpretation:**

Transforms raw CSV data into actionable insights, enabling easy identification of dead stock and generating strategies to manage deadstock & decrease loss.

- Democratized Data Access with Query Analyzer:**

Allows non-technical users to query datasets in natural language, eliminating the need for coding or SQL knowledge.

- Automated Campaign and Report Generation:**

Generates marketing posts, YouTube Shorts, or concise reports based on data trends, improving team collaboration and decision-making.
